Dear Patient,

I will mark my 20th year in practice on January 3, 2023. Thanks to patients like you, it's been an incredible experience. Yet all good things do end. I will be closing HealthSpan on March 31, 2023. I will then open a new practice specializing in Resonance Repatterning, a process that helps identify and transform subconscious patterns that undermine our health and happiness and prevent us from achieving our hopes and dreams. I saw many people in my practice, who despite sincerely wanting better health, could not make the necessary changes. This is an example of how subconscious patterns hold us back. I am passionate about the Resonance Repatterning process and how it addresses root causes. It will offer a more flexible schedule to enjoy time with my husband, who will be retiring at the same time.

Because the first quarter tends to be slower, I suspect I can see most patients with annual visits due in April before we close. I am also happy to update Biomeridian programs, as I am unaware of anyone locally doing this work. And yes, I am happy to see you one last time for any reason. Please let Lori know.

If you recently established care with me, do not be concerned. Most patients are working their plan and improving in this amount of time.

I have listed below some suggestions for practitioners you might consider. As I reflect on my career, I realize that your concerns, not just my interests, motivated me to become the physician I am today. I encourage you to co-create your next practitioner by encouraging them to expand their knowledge to meet your needs.
